Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This communication is in response to the Request for Continued Examination filed on 11 January 2006. Claims 44-106 are currently pending.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 44, 45, 51-54, 63 and 64 are rejected under 35 U.S.C. 102(b) as being anticipated by Legette (U.S. 5,456,271).

Legette discloses an apparatus 10 having a circular rod 18 with a hooked portion 20 disposed within a body 14 and a bead stop 38 coupled to the body 14. The hooked portion 20 is adapted to string filamentous material 12 through at least one bead 16 having a thru-hole. The recitation "is forced off said rod via said bead stop" is purely functional and does not offer any structure that further limits the apparatus claim nor any structure that defines over the prior art.

With regard to claim 45, a handle 13 is coupled to the body portion 14 via brackets (28, 30).

With regard to claim 51, the circular rod 18 receives a plurality of beads 16 (Figure 2) thereby enabling the beads 16 to be quickly loaded in place.

With regard to claim 52, the rod 18 is stationary except when the trigger 24 is actuated. The bead stop 38 is moveable since it threadably engages shank 36.

With regard to claim 53, the bead stop 38 is stationary and the rod 18 is moveable when the trigger 24 is actuated.

With regard to claim 54, the bead stop 38 and the rod 18 are both moveable.

With regard to claim 63, Legette discloses a rod 18 having an end portion and a hooked portion 20. The end portion and the hooked portion are at opposite ends of the rod 18. A support 42 is coupled to the rod and has a plurality of guides 45.

A spring 44 is coupled to the rod 18 wherein the rod has a bent portion to keep the spring in place between the bent portion and one of the plurality of guides 45.

With regard to claim 64, a trigger 24 is coupled to a spring 44 so as to compress the spring to move the rod 18.

Allowable Subject Matter

4. Claims 55-62 and 68-106 are allowed.
5. Claims 46-50 and 65-67 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Turner et al. '736 and Kennedy '864 disclose various devices for decorating a person's hair.
